PROFESSIONAL SUMMARY

Cybersecurity professional with 3+ years of experience in incident response, threat detection, and security automation. Specialized in analyzing complex security events, conducting threat investigations, and developing detection rules to identify advanced threats. Proficient in Python automation, multi-cloud security assessment, and applying MITRE ATT&CK framework for threat analysis. Demonstrated expertise working with SIEM, EDR/XDR, and threat intelligence platforms. Strong foundation in incident response procedures, forensic investigation, and proactive threat hunting. Seeking opportunities to leverage technical expertise in security operations, threat research, or cloud security.

PROFESSIONAL EXPERIENCE

Vigilance MDR Security Analyst

SentinelOne

Remote (Costa Rica)

Dec 2025 – Present

- Investigate and respond to 100+ daily security incidents across multi-tenant environments; perform incident triage, risk assessment, and escalation ensuring rapid containment and SLA compliance
- Conduct threat hunting operations using endpoint behavioral analysis and digital forensics; perform root cause analysis to identify attack vectors and prevent recurrence
- Analyze endpoint, network, and threat intelligence data to determine malicious patterns; correlate findings with MITRE ATT&CK framework

Cyber Security Operations Analyst – Intermediate

Equifax

Mata Redonda, San José

Nov 2024 – Dec 2025

- Investigated real-time security alerts and incidents from SIEM, EDR, proxy, and threat intelligence sources
- Engineered 10+ detection use cases and correlation rules aligned to security standards; validated detection accuracy across 300+ daily events
- Developed custom Python scripts for incident automation, log enrichment, and OSINT correlation; reduced alert triage time by 30%
- Conducted vulnerability assessments and cloud security reviews using multiple assessment tools
- Mentored junior analysts on incident investigation techniques and threat analysis methodologies

Cyber Security Operations Analyst – Entry

Equifax

Mata Redonda, San José

Jan 2024 – Nov 2024

- Performed incident triage on 2,000+ security alerts; assessed severity and escalated validated threats
- Optimized SIEM rules and EDR detection parameters; improved detection precision and reduced false positives
- Developed automated incident response workflows using SOAR platform to accelerate containment

Cyber Threat Detection Engineer – Intern

Equifax

Mata Redonda, San José

Jul 2023 – Dec 2023

- Analyzed security alerts and EDR telemetry to optimize detection logic; reduced false positive rates through iterative tuning
- Developed and validated EDR detection rules aligned to threat behaviors and attack patterns

TECHNICAL PROJECTS

Sysmon Hunter – Python-based Threat Investigation Tool

2026

Engineered Python automation tool to parse and analyze Windows Sysmon event logs for threat detection and forensic investigation. Identifies suspicious process behaviors, lateral movement, privilege escalation, and persistence mechanisms aligned to MITRE ATT&CK. Implements automated indicator enrichment pipeline integrating OSINT sources. Improved investigation coverage and reduced mean time to identify (MTTI) for advanced threats.

EDUCATION

Bachelor's Degree in Computer Science

Universidad de Costa Rica

Montes de Oca, San José

Jul 2023

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

-
- Certified Threat Hunting Professional (eCTHP) – INE Security
 - Practical Malware Researcher Professional (PMRP) – TCM Security
 - Multi-Cloud Blue Team Analyst – CyberWarFare Labs (2025)
 - Associate Cloud Engineer – Google Cloud (2024)

TECHNICAL SKILLS

Incident Response: Incident triage and assessment, Root cause analysis, Threat investigation, Digital forensics, Malware analysis, Endpoint & network log analysis, Post-incident documentation, Incident containment

Threat Detection: Threat hunting, MITRE ATT&CK framework analysis, Detection rule development, SIEM tuning, Alert optimization, Cyber Kill Chain analysis

Security Tools: SIEM platforms, EDR/XDR (SentinelOne), SOAR platforms, Cloud security assessment tools (Wiz, Qualys), Windows Sysmon, OSINT tools, Threat intelligence platforms

Cloud Security: Google Cloud Platform (GCP), Multi-tenant cloud infrastructure, Cloud-native security logging, Cloud environment investigation

Programming: Python (Advanced) – automation, log analysis, OSINT scripting; C/C++ (Intermediate); JSON; API integration

Security Frameworks: MITRE ATT&CK, Cyber Kill Chain, NIST Cybersecurity Framework, Incident response methodologies, PCI DSS, SOC 2
